# INTRODUCTION

- Online Text editors allow us to write, edit and review documents without installing any software on your computer.
- We can also access them from any device that has an internet connection including tablets or smartphones.
- It can do necessary text formatting and other features as that of offline text editors. It also helps to make sharing of documents easier.
- We created an online text editor with essential functionalities using popular web technologies.

# FUNCTIONALITIES

- Create new document.
- Give basic text formatting such as bold, italic, underline, left align, right align, center align and justify.
- Give a filename and download the file in TXT format.

# TECHNOLOGIES USED

- Frontend:HTML,CSS and Javascript.
- Bootstrap package is used for design purpose.
- Javascript is used to make the website dynamic.
- The backend is done using PHP.
